COMB SAGE TEA IN HAIR TO DARKEN IT

It's Grandmother's Recipe to Keep Her Locks Dark, Glossy, Thick

The old-time mixture of sage tea and sulphur for darkening gray, streaked and faded hair is grandmother's treatment, and folks are again using it to keep their hair a good, even color, which is quite sensible, as we are living in an age when a youthful appearance is of the greatest advantage.

Nowadays, though, we don't have the troublesome task of gathering the sage and the mussy mixing at home. All drug stores sell the ready-to-use product called "Wyeth's Sage and Sulphur Compound," for about 50 cents a bottle. It is very popular because nobody can discover it has been applied. Simply moisten your comb or a soft brush with it and draw this through your hair, taking one small strand at a time; by morning the gray hair disappears, but what delights the ladies with Wyeth's Sage and Sulphur is that, besides beautifully darkening the hair after a few applications, it also produces that soft luster and appearance of abundance which is so attractive; besides, prevents dandruff, itching scalp and falling hair.—Adv.

WIND CAUSED WRECK.

By Blowing Freight Car in Path of Express Train.

Middlebury, Jan. 8.—Wind that approached a hurricane velocity struck here yesterday incidentally being the means of a train wreck, demolishing trees and wires and blowing in windows.

A freight car standing on a siding in the railroad yard was pushed along on the main track. When the northbound sleeper came along at the rate of 40 miles an hour, it crashed into the freight car, throwing it off the track and practically demolishing it. The engine and cab were somewhat damaged and the cylinder head broken. A wreck train from Rutland repaired the damage and the train was delayed nearly two hours.

TO SUE SOUTHERN PACIFIC FOR \$50,000,000

Three Suits Totalling This Amount Were Scheduled to Be Filed Yesterday Against Railway and Subsidiary Oil Companies.

San Francisco, Jan. 8.—The Southern Pacific company and several of its subsidiary oil corporations are named as defendants in three suits involving approximately \$50,000,000 scheduled to be filed yesterday in Los Angeles by the United States government, according to announcements made here. These actions involve the title to more than 1,000 acres of property in Kern county upon which more than 100 oil-producing wells are located. The government will ask that a receiver be appointed to handle the output of the properties until the action has been decided in court.

The complaints contain allegations that the Southern Pacific company misrepresented the land in question as "agricultural" when application was made which resulted in patents for the land being issued by the government. It also is alleged that the railroad company knew that the land was oil bearing property at the time. The action is along the lines of several suits instituted against the Southern Pacific company by the government during the last two years.

WHAT CAUSES COLDS?

This question and "How to Prevent Colds" is asked a thousand times every day. A cold is really a fever, not always caused by the weather but due to a disordered condition of the blood or lack of important food-elements. In changing seasons fat foods are essential because they distribute heat by enriching the blood and so render the body better able to withstand the varying elements.

This is the underlying reason why the medicinal fats in Scott's Emulsion quickly overcome colds and build strength to prevent more serious sickness. It contains nature's medicinal fats, so skillfully prepared that the blood profits from every drop, and it is free from harmful drugs or alcohol.
